SOFTWARE

### ► **Markets**

- Restaurant
- Delivery
- Transportation
- Retail

### **Applications**

- Credit Card Processors
- Financial Institutions
- Acquirers

### **Multiple Terminals, Multiple Environments, One Solution**

Hypercom's Standard Point Of Sale (SPOS) financial software, SPOS32 is the platform software shared by many of the Optimum countertop and portable devices. The Optimum products benefit from a single software platform that can be used across multiple industries such as retail, restaurant, mail order, commercial/purchase, and e-commerce.

The powerful SPOS32 software allows you to easily select your preferred operating language from English, Spanish or French; change receipt font size; perform Dynamic Currency Conversion and enable Automatic Tip Calculation at the local terminal level. Installations and terminal configurations proceed at a much faster pace because no additional downloads are required.

SPOS32 software specifications allow it to be used by most major processors and hosts to process credit, debit, EBT, check and gift/loyalty transactions with the added benefits of supporting multiple merchant software solutions within one payment terminal and quick partnering of peripheral devices such as contactless readers, check readers and pin pads.

*Automatic Tip Calculation*

*Supports Secure Multi Application*

*Certified by Processors and Acquirers*

## **POWERFUL TERMINAL PAYMENT SOFTWARE**

**Profit From Multi-Merchant** ► Load multiple revenue generating applications

**Easy To Use** ► Quick partnering of peripheral devices

**Robust** ► Automatic tip calculation, dynamic currency conversion and more

**Multiple Languages** ► Choose from English, Spanish or French

**Minimal Training** ► Easy to follow screen prompts

**Increase Profits** ► Service your retail customers in less time

SOFTWARE

### PAYMENT SOFTWARE FOR EVERY MERCHANT

Provide customers with a wide variety of value added applications faster than ever before. A common software platform across multiple Hypercom terminals means developing one application that can be used in several different environments without additional development costs.

Hypercom's SPOS enabled Optimum terminals employ the highly successful setup wizard first seen in the Optimum T4100. The user interface incorporates simple and easy to understand terminology for each prompt with an embedded help system to simplify deployments by taking the guesswork out of even the most daunting configurations.

SPOS32 is a financial software platform that provides merchants the ability to make changes to terminal settings at the local level without requiring outside support. The current version of Hypercom's SPOS has many features that can be activated or deactivated simply by toggling the option on or off.

- ▶ **Account Truncation**
- ▶ **Truncate reports**
