

Term-Master Suite®

► Applications

- Financial Institutions
- Processors
- Large ISO's

Customize Terminal Application Software

Hypercom's Term-Master® Suite is a terminal management system that gives customers the ability to quickly and cost-effectively download, initialize and control entire terminal populations from one central location.

This robust software solution includes the following modules:

- System Manager
- Request Manager
- Profile Manager
- Request Manager Console

With its centralized administration ability, multiple data sources are easily supported from database systems such as Microsoft Access, dBase, Oracle and Microsoft SQL Server. This modular design approach is also customizable to fit your individual business needs and allows for future scalability.

The decision is simple. Hypercom's Term-Master Suite is the right software that allows you to easily and quickly manage your terminal profiles and software downloads - from one centralized location.

Control terminal population from central location

Administer 1,000 to 100,000 terminals

Simplify terminal profile data management

TERMINAL MANAGEMENT SOFTWARE

Centralized administration ► Control terminal population from database systems

Module design ► Scalable to fit your business needs, now and in the future

Secure firewall protection ► Guards against corruption and external invasion

Full redundancy ► Complete control and disaster recovery on information

Easy to use ► Diagnostic tools, call tracking and performance monitoring are available

Monitoring capability ► View entire terminal systems from any location

Term-Master Suite®

CUSTOMIZE TERMINAL APPLICATION SOFTWARE.

TECHNICAL SPECIFICATIONS:

PROCESSOR

- Intel Pentium (or equivalent), 1GHz or higher

DISPLAY

- VGA color (SVGA recommended)
- Microsoft mouse or compatible pointing device

OPERATING SYSTEM

- Microsoft Windows XP, Windows 7
- Microsoft Windows Server 2003, Server 2008

MEMORY

- 128MB RAM (minimum)
- 100MB local hard drive for temporary files

STORAGE

- 4GB hard drive (minimum) for data, if PC is part of a network, this data drive must be common to all PCs

DATABASES (COMPATIBLE WITH)

- Oracle 11g
- Microsoft SQL Server 2005

Flexible

- ▶ Customizable profile editing interface presents only the commonly changed data elements in a concise and simple to understand format to allow customers to create, modify and manage profile databases quickly and easily through its intuitive interface and standard templates
- ▶ Help screens for every entry and configuration checking process ensure setup is complete and easy to accomplish
- ▶ Centralized administration of multiple data sources with support for database systems such as Access, dBase, Oracle and MS-SQL Server
- ▶ Modular design is customized to an individual business' needs to allow future scalability.

Secure

- ▶ Firewall-protected information systems and high levels of built-in security guard against corruption and external invasion to protect investment
- ▶ Extensive array of diagnostic tools, call tracking and performance monitoring feature with help screens are available for every entry and configuration checking process, which ensures tasks are complete and easy to accomplish
- ▶ Full redundancy of database and terminal information to provide complete control and disaster recovery.

Powerful

- ▶ Uniformly manages terminal networks from medium (1000) to very large (more than 100,000) terminals, even during peak transaction times
- ▶ Term-Master gives users the ability to quickly and cost-effectively download, initialize and control entire populations of Hypercom terminals from one central location
- ▶ Remote request manager monitors entire terminal systems and lets users view the status of all information from any location.
